

Understanding the API

Download the Postman collection on <https://meetingsapp-isfg.onrender.com/> and import it in Postman app. Use the API documentation to understand the API, and try to use the API.

1. First register yourself using the registration API.

```
POST https://meetingsapp-isfg.onrender.com/api/auth/register
```

Send the user details as raw JSON data in the following format (**Body** -> **raw** -> **json**)

```
{
  "name": "Jonathan Doherty",
  "email": "jonathan.doherty@example.com",
  "password": "Password123#"
}
```

2. Then login to get an API token

```
POST https://meetingsapp-isfg.onrender.com/api/auth/login
```

Send the user details as raw JSON data in the following format

```
{
  "email": "jonathan.doherty@example.com",
  "password": "Password123#"
}
```

- Note down the **token** that you get in the response. You need to add this in the **Authorization** header in future requests.

3. To view the registered users in the application

```
GET https://meetingsapp-isfg.onrender.com/api/users
```

Make sure to add the **Authorization** header (**Headers** tab) with your token. For example,

```
Authorization:
eyJhbGciOiJIUzI1NiIsInR5cCI6IkpXVCJ9.eyJlbWFnZW50IjoiIiwiaWF0IjE3NTcyMjUzZd9.e02eqcZJ94QiUaUWvXME
Xu4vk6_-1ZG_iSwE0WCGUw4
```

4. Now try creating a meeting

```
POST https://meetingsapp-isfg.onrender.com/api/meetings
```

Send the user details as raw JSON data in the following format

```
{
  "name": "Google marketing campaign",
  "description": "Increasing brand awareness and spreading information about new products",
  "date": "2025-09-30",
  "startTime": {
    "hours": 9,
    "minutes": 0
  },
  "endTime": {
    "hours": 10,
    "minutes": 30
  },
  "attendees": [
    "dhoni@example.com",
    "kohli@example.com",
    "amitabh@example.com"
  ]
}
```

Make sure to add the **Authorization** header (**Headers** tab) with your token. For example,

```
Authorization:
eyJhbGciOiJIUzI1NiIsInR5cCI6IkpXVCJ9.eyJlbWFnbnCI6ImB1cmFuaWsyQG4yW1w1bGUyY29tIiwidXNlcklkIjoibjhiYmQwMTNlMDhhZGMwMDYyOTAzNDU5IiwiaWF0IjoxNzU3MTM4MDc3LCJleHAiOiE3NTcyMjUzNzd9.e02eqcZJ94QiUaUWvXMEXu4vk6_-1ZG_iSwE0WCGUw4
```

5. View your meetings for a day (**calendar**) – make sure to give a date where you have meetings scheduled.

```
POST https://meetingsapp-isfg.onrender.com/api/calendar?date=2025-09-30
```

- Do add the token in the **Authorization** header

6. Go ahead and explore the rest of the APIs. You will need to understand what request type, request body and query string parameters to send (if any).
